

PEBBLES PROJECT

HEALTH & WELLNESS SERVICE - DRISCOLL'S MOBILE HEALTH CLINIC

// ABOUT THE SERVICE

For many families living in the remote farming communities of Clanwilliam and surrounding areas, accessing basic healthcare is often a significant challenge. Long travel distances, limited transport options, financial constraints, and time away from work can prevent vulnerable children, women, and families from receiving the care they need.

The Driscoll's Mobile Health Clinic bridges this gap by bringing essential healthcare services directly to rural communities. More than a healthcare service, the mobile clinic empowers communities with the knowledge and support needed to make informed decisions about their health and wellbeing. By focusing on prevention, early intervention, and health education, the service helps build healthier families, stronger communities, and brighter futures for generations to come.
